Company Profile

ZELCO was founded with the basic mission

*to assist companies in improving
Customer Service and Productivity
through the optimised use of
Integrated Logistics.*

ZELCO holds a policy to employ multilingual consultants who can look back on a successful management career and therefore can understand quickly the real business needs. In addition they can communicate easily with all levels of the organisation.

ZELCO believes that the proposed solutions must be based on the full understanding of the **clients business** and its **corporate culture**. This implies the creation of a climate of confidence and cooperation between all members of the organisation and the supply of the vital know how to bring the organisation to a higher level of competence.

ZELCO assists companies to create lean, productive, flexible and agile organisational structures and to implement the necessary systems, procedures and communication lines to respond quickly to the changing market needs. ZELCO does not only provide solutions but also the necessary co-management to conduct the change process.

Alfons Van Zele is the founder of ZELCO. He holds a degree of Business Engineering from the University of Louvain **KUL** and was further educated at **Vlerick** School in Ghent and at **Insead** in Fontainebleau. After **20 years** of high level **management experience** mainly in the customer driven Retail business he created an international consulting practice and developed the ideas of **INTEGRATED LOGISTICS** and of **CO-MANAGEMENT**. He was also president of the Logistics Committee within CIES and Professor at ICHEC in Brussels.

Our working method

*ZELCO identifies **2 distinct phases** when implementing the philosophy of INTEGRATED LOGISTICS.*

Phase 1

is the definition of the common **VISION** and the development of the specific **Logistic Concept**. This concept provides clear answers to the problems of

optimisation of customer service

definition of responsibilities

optimisation of Production Planning, Inventory levels and Distribution Networks

selection of the integrative computer system to support the operation and to monitor the operational and financial performance.

Phase 2

provides the necessary **Co-management** to implement the concept throughout the company and to introduce the change in culture and behavior in an efficient and ever lasting way.

ZELCO has **proven records** of implementation of Integrated Logistics in **DISTRIBUTION** for **Food** and **Non Food** products as well as in **MANUFACTURING** in **PROCESSING** and **ASSEMBLY** industries in several European Countries including Belgium, The Netherlands, France, Spain, Slovenia etc.
